

## ESD sticky mat for cleanroom environment

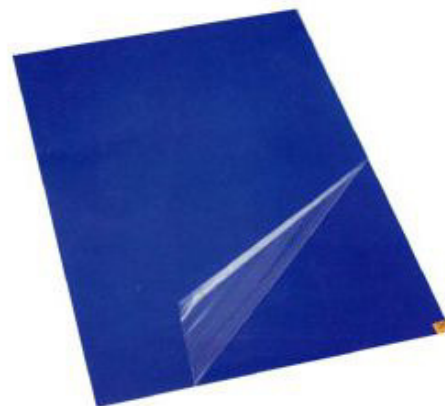

### Product Description

#### Outline

Sticky mat is mainly stuck at the entrance of clean space and buffer area. It can effectively stick and remove dust from sole and wheel to minimize the effect of dust on quality of clean environment. In this way, dust removal is easily achieved, unlike other mat that cannot remove dust thoroughly and ensure indiffusability of dust.

#### Applications

Aerospace and nuclear industries  
 Electronics, computer industries.  
 Semiconductor electronic manufacturing.  
 Instrumentation, medical device manufacturing.

### Technical details

PROPERTY		STICKY MAT
Film	material	LDPE
	color	Blue
Packaging		30 layers/pcs; 10 pcs/pack
Size (cm)		60 x 90
Rupture elongation factor(%)		Over 250
Tensile strength(kg/cm2 )		Over 170
Heat-resistant experimental		60 degree
